5. **TOOLS REQUIRED:**

   - #2 Phillips 90° Screwdriver
   - Rag

6. **INSTALLATION PRECAUTIONS / SPECIAL NOTES:**

   (A) Be careful not to damage the vehicle and the splash guards during the installation.
   (B) The splash guards are made of plastic. Avoid any heavy impact.
   (C) After the installation is complete, make sure all the screws, nuts, bolts and other components are tightened securely.
   (D) Installation surface must be clean.
7. INSTALLATION PROCEDURE:

The procedure below shows the installation for the right side. Repeat the same procedure for the left side.

1. Removal of the screws from the vehicle

   a) Wash any dirt and oil off of the installation surface with mild soap and water.
   b) Remove the tapping screws (4 locations) and discard.

   **Important**
   
   Turn the tire to the right during the installation of the right side splash guard. (Turn the tire left during left side installation.)

2. Front splashguard installation

   a) Install the front splashguard with supplied tapping screws. Push upwards, rearward and inward while tightening screws.
   b) Tighten screws in sequence shown. **Do not over tighten.**

   **Important**
   
   Hold the splash guard tight to the vehicle while tightening the screws. Be sure no gap occurs between lower panel and splash guard.
