

NERS Re/programming and Configuration Login Instruction Guide

Nissan and INFINITI vehicle uses a high level of security when Re/programming and configuration are performed to the vehicle ECUs. With the release of software version 4.00.01 and greater, technicians will be required to login with their Nissan or Infiniti Techno website user ID and password to perform Re/programming and configuration in NERS.

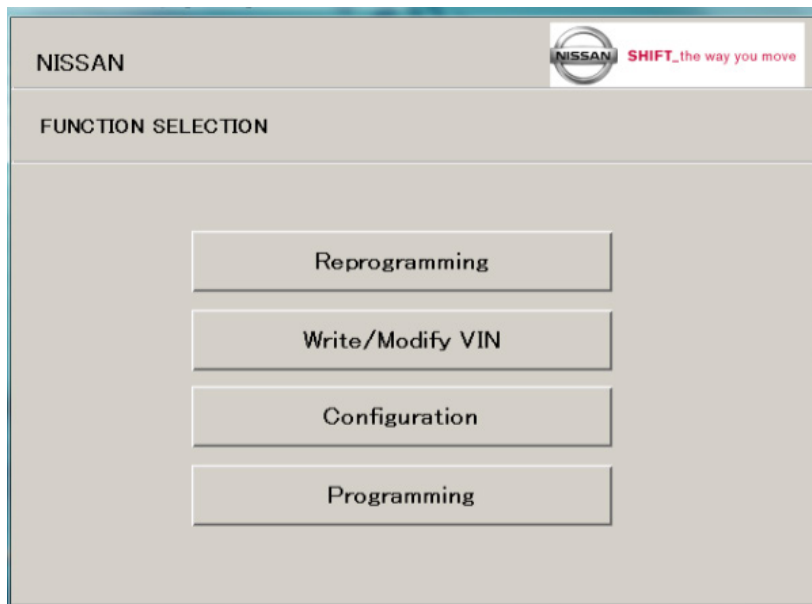

- ✓ **Note: For INFINITI QX30 vehicle, follow the instructions listed on this website.**

Requirements:

- Registered user on Nissan-techinfo.com or Infiniti-techinfo.com
- Active NERS software Annual Subscription
- NERS PC must be connect to the internet via Wi-Fi or LAN cable.

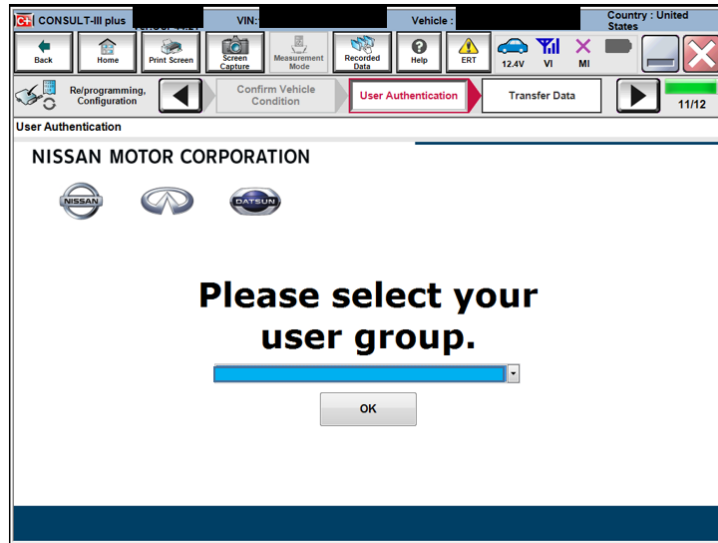

Instructions:

1. Select Reprogramming, Programming or Configuration

2. Proceed with your normal Re/programming and Configuration steps in NERS. The user authentication step will be displayed just prior to the Re/programming or Configuration data transfer. See screens below. Once your login has been verified, the Re/programming and Configuration will automatically begin.

3. Select USA/CANADA Aftermarket

Please select your user group.

4. Login screen will appear. Enter your Nissan or Infiniti Techinfo website user ID & password.

5. Once your login has been verified, the Re/programming and Configuration will automatically begin.

6. If you experience login error, please email Cust_Assist@tweddle.com.
